

Freeduino Spring Training

**Switches and
Sensors**

Join LVL1, Louisville's Hackerspace, for a class on how to program the amazing Arduino/Freduino. You will learn about electronic circuits and programming through a series of fun experiments. You will get to play with (and take home) breadboards, LEDs, LCDs, switches, thermistors, potentiometers, photocells, motors and speakers. Bring your laptop. Put me in coach, I'm ready to play!

May 18, 2010

7-10 pm

**U of L Speed School Electronics Lab
W. S. Speed 210 - Sign up on-line**
